

POEMS by Robert Fischer

The greatest generation
2003

It's been said, "MY GENERATION,
WAS THE BEST GENERATION".

The W.W.II era. For some time I thought
that might true. Mr. Brokaw thought so,
and even wrote a book about it. History
will ultimately make that decision.

One thing is for sure, I believe that the
present generation has not been tested
the same as we were. They posses skills that
we could only imagine. We are in a computer
generation with everything computerized.
They are better educated, and eager to learn.

They say that this generation is not patriotic,
is skeptical of our government, and lacks in

work ethics. "I DON'T THINK SO". My children fly the flag, pay more taxes, and work more hours than we had to. I am not hearing them complain. I believe if given the same circumstances, they would act in kind.

Our country is not in any danger from this generation, Are they not from us? Our children are a beautiful amalgamation of the generations. We all know about "THE APPLE DOESN'T FALL FAR FROM THE TREE".

Cowards hijack and kill innocent people. They do it in the name of religion. What an oxymoron. The perpetrators of the World Trade Center and Pentagon catastrophes will discover what cowards and traitors eventually do. They will pay for these senseless acts.

It is my guess that this generation is in for a long hard struggle with an enemy that has no regard for human life, not even their own. I have faith that this generation is up to the task, and the cream will rise to the surface and show it's self.

*“IT IS MY BELIEF THAT WE MAY BE
SEEING THE GREATEST GENERATION,
EVERYTIME WE VISIT OUR CHILDREN.*
